

Angophora costata

Habit : Large tree

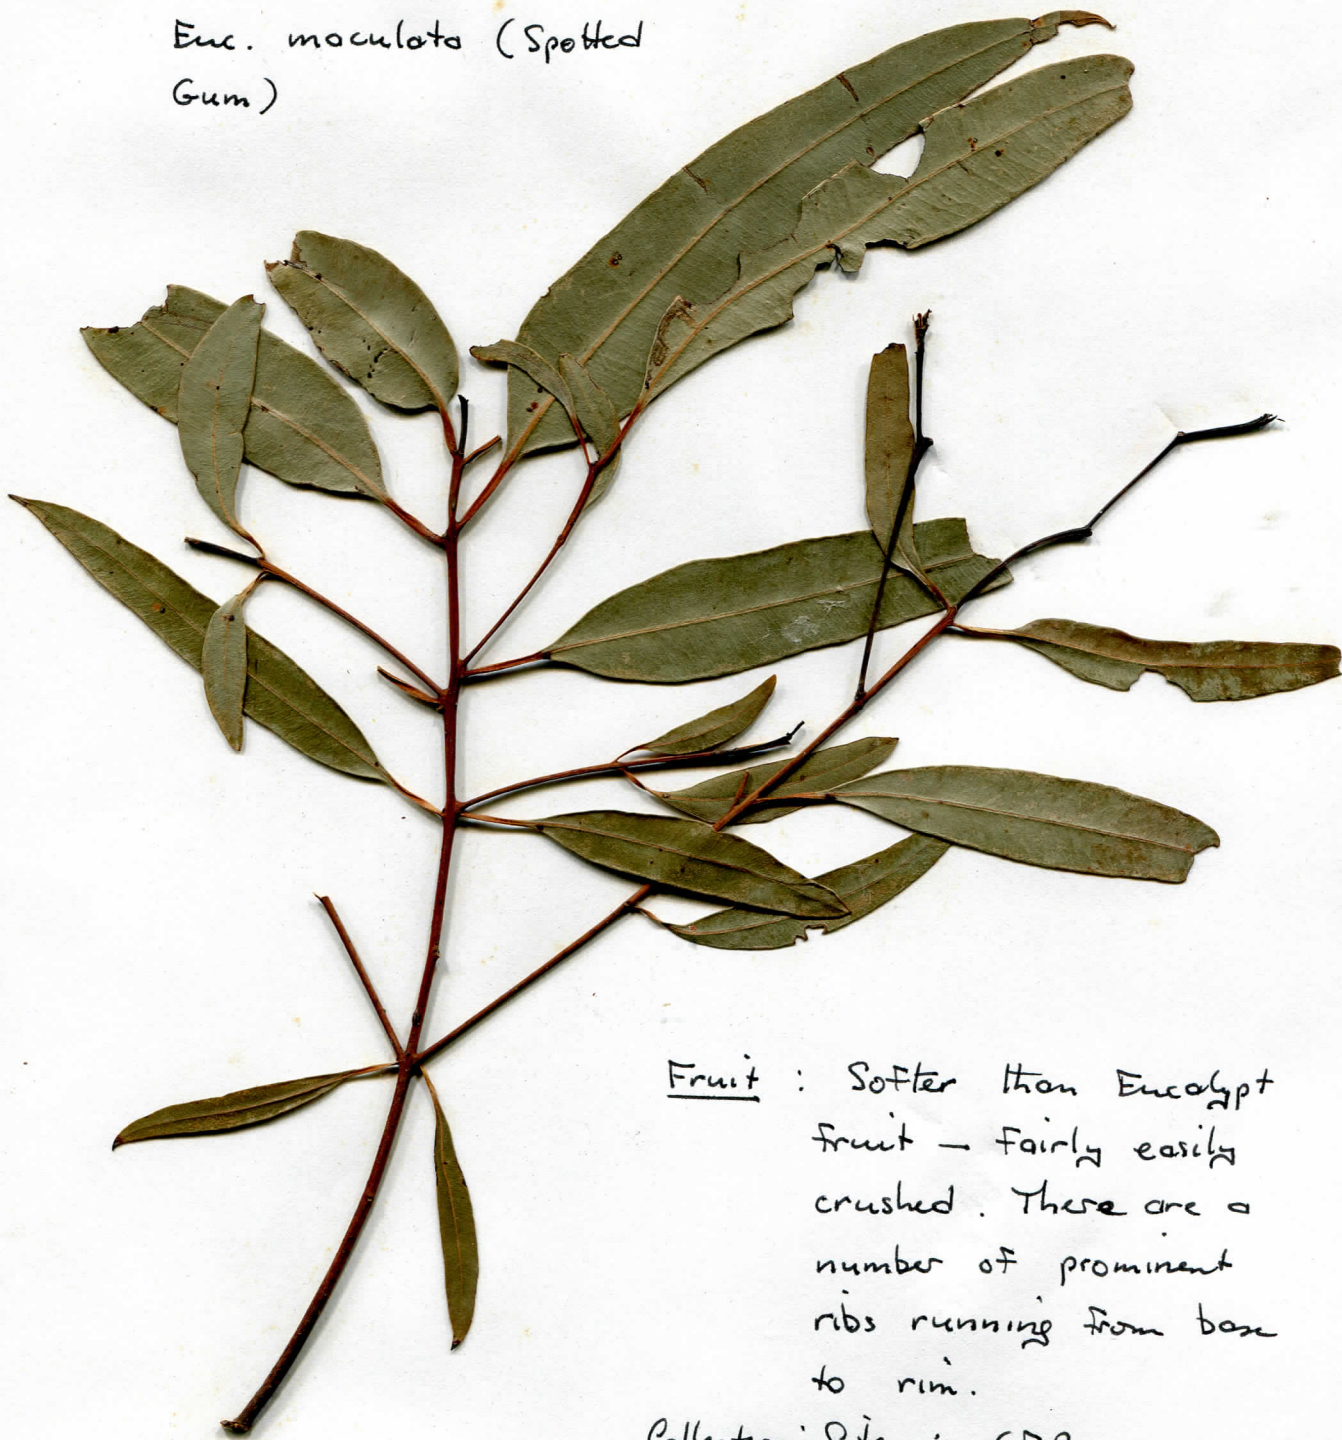

Habitat : Eucalypt forest

Bark : Sheds bark about April.

New bark is a rusty-red colour,  
which fades to resemble very  
closely the peck-marked  
Euc. maculata (Spotted  
Gum)

Fruit

Fruit : Softer than Eucalypt  
fruit - fairly easily  
crushed. There are a  
number of prominent  
ribs running from base  
to rim.

Collection Site : GFP

Collection Date : March 1987
